User Manual for Rideshare - Team #NoLife

Created 11/3/15
Revised 11/24/15

Begin: Click the "Login" button to access the app.

Login: Please enter your email address and press "Log In."

Choice: Please click "Log Out" to log out of the app, or click "Continue" to access the app.

Homepage: Across the top of the page, you can choose to view your profile by clicking "Profile," to add a ride by clicking "Adding a Ride," or to search for rides by clicking "Searching a Ride."

Profile: On your profile page, there is a map of your rides. You will see a list of your rides below the map. For each ride, you can choose to edit or delete it if you wish. If you edit, you'll need to follow the same rules as when you added the ride. If you delete, there is no way to get the ride back afterwards.

Adding a Ride: Please enter your full name, email (example@example.com), origin (the place you are leaving from, 123 Example Street, City, ST), destination (the place you are going, 123 Example Street, City, ST), departure time (in 24-hour time, for example 2PM = 14:00), arrival time (in 24-hour time). Select 'driver' if you have a car and will be driving, select 'rider' if you are looking for someone to drive you. Select days of the week if you will be going every week on certain days. When you have entered all the information, press "Submit." You will be redirected back to the Homepage if all the fields are entered correctly, or directed to an error page which explains the problem if you have missing or incorrect information.

Searching a Ride: You can use as many of the search fields as you want. If you have the email of the person whose ride you're looking for, enter it in the "email" field. If you have a starting place in mind, enter it in the "Origin" field in the format 123 Example Street, City, ST. In the "origin range" field, if you want to, enter the maximum number of kilometers you want between your starting place and the rides starting place. If you have an ending place in mind, enter it in the "Destination" field in the format 123 Example Street, City, ST. In the "destination range" field, if you want to, enter the maximum number of kilometers you want between your ending place and the rides ending place. If you have a leaving time in mind, enter your earliest possible leaving time in the "departure time" field in 24-hour time format. If you have an arrival time in mind, enter your latest possible arrival time in the "arrival time" field in 24-hour time format. If

you are looking for a driver, leave the button on driver. If you are looking for a rider, select "rider." Select days of the week if are looking for rides going every week on certain days. At the bottom, if you to see the rides sorted by closeness to your starting point and your ending point, select "origin and destination". If you want to see the rides sorted by closeness to your starting place, select "origin". If you want to see the rides sorted by closeness to your ending place, select "destination". None of the fields are mandatory, but you can use all of them if you want.
